

Clopper's Mill West

HOA Board

7/16/09

Dear Rob,

It was great to meet you and your fellow board members on Tuesday evening. We felt as though it was a productive conversation, and are hoping that you all were able to leave at a decent hour.

This is a follow up as per your request with some helpful links for the homeowner. Dsire is a good resource for all available incentives state by state. The MEA website offers more specific details for what is currently available in Maryland. An interesting website to look through for the technically related that provides detailed information on system production for your longitude and Ambient temperature is PV Watts.

<http://www.dsireusa.org>

<http://www.energy.state.md.us>

<http://www.nrel.gov/rredc/pvwatts>

Please let us know if you have any additional questions. We look forward to setting up a time when we can meet with a group of homeowners to go over their options. The hope is that we reach a point where all families who are interested can agree on a day where we come out and evaluate their roofs. Group discounting will be determined by the number of families interested in installing in the community.

We look forward to hearing your thoughts, and formulating a plan of action for Clopper's Mill West.

Best,

Hilleary Topercer and Katherine Kesselring
